

The Federal Communications Commission

Dear The Federal Communications Commission,

I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund since this proposal could make my current service unaffordable.

The flat fee proposal you are considering means that people who make few long distance calls would pay the same as high-volume users. This is unfair!

I use my wireless phone almost entirely for safety and security reasons. I make fewer than 20 phone calls a year! As a senior citizen, I find the security offered by a cell phone important, but cannot afford high costs. Please don't take away the benefits of low-cost wireless so that big businesses can pay less than their fair share.

I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Rhoda Kubrick
